

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_49165
Title of the Manuscript:	Intrinsic Viscosity-molecular Weight Relationship of Poly (hexanediol adipate)
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This paper deals with the Relationship between Intrinsic Viscosity and molecular Weight of a polymer, it is the essential property of a polymer, so I support it to be published in the journal after minor revision. 1, what is the MHS standard for? 2, general concentration not used the capital C but small c in page 6;	MHS means Mark-Houwink-Sakurada equation. The capital C(g/dL) is the concentration of the polymer solution, it's not the general mole concentration, therefore, use the capital C to tell the difference between c(mole concentration) and C(mass concentration).
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	There are not ethical issues in this manuscript .
