

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Infectious Diseases
Manuscript Number:	Ms_AJRID_48828
Title of the Manuscript:	Improving Detection of Trichomonas vaginalis infection among adult females in a Resource-Poor setting in Ogoni, Niger Delta, Nigeria
Type of the Article	Original article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a very interesting study in the field of STDs. Trichomonas vaginalis is a parasite that tortures a lot of women especially in the underdeveloped world. The study is well organised. The authors examined a great number of women so the sample is big enough and the method followed is easy reproducible and right. The authors used two techniques and then they compared them. The findings show that Giemsa stain provides better diagnosis. This study can be useful to the medical community of Nigeria. I have no objection to the publication of this manuscript	OK
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
