PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	An interesting article showing the <i>Tridax procumbens</i> role in curing potassium bromide induced kidney toxicity in rats. This has to be accepted after careful revision. 1. <i>Tridax procambens</i> should be appeared completely at first instance and later it should be <i>T. procambens</i> . 2. How come the authors decoded the concentration/dosage of extract in the rats. Include the rationale of dosage of ethanol extract. 3. The foot note of the tables should be included with description of A, B, C and D mentioned within the tables. 4. Ethical approval number should be added in the Animals section.	The authors have read through the comments and made necessary corrections.
Minor REVISION comments	1. b.w should be expanded in the figure legend.	
Optional/General comments	Can be accepted for publication after careful revision of the manuscript.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details) Ethical approval number was not mentioned in the text.	The country and location where the research was carried out do not give ethical approval number. Also, most articles I have read do not include ethical approval number but must state that it was approved by the ethical committee
