PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|--|---|
| <p>My first comments was: <i>This manuscript must be totally restructured, it does not present clear and accurate information, the figures are not explained, and the text says histopathological changes that are not clearly observed in the figures. The bar of the amplification in the figures is not shown in them. There is very little and no relevant backup reference. THE AUTHORS IS NOT MADE THE CHANGES NECESSARY. THE FIGURES ARE NO EXPLAINED; I CAN NOT SEE THE HISTOPHATOLOGICAL CHANGES INDICATED BY THE AUTHORS. IN THE INTRODUCTIONTHE REFERENCES ARE SO OLD.</i></p> | <p>The author made correction in the manuscript as per evaluator's comment. The figure has been explained properly in the manuscript. Histopathological changes had been added. Reference part has been upgraded with new references.</p> |
