

SDI Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_48970
Title of the Manuscript:	Pullback Absorbing set for the stochastic lattice Selkov equations
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Optional/General comments	<p>Manuscript is sententious and deducible. Design,language and fluency are wonderful.Auyhors introduced a transformation of addition involved in special process is exploited to deal with the challenge in proving the property for the stochastic reversible Selkov system in an in⁻ lattice .Proof of theorems are looking true.References are enough for this study.</p> <p>I recommend that this very valuable study can be accepted for possible publication in present form.</p>	The author is agreed with reviewer.

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
