**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		<u>Our Article is an original research paper.</u>
<b><u>Minor</u></b> REVISION comments	<p>There is a minor revision in the manuscript. They should be corrected.</p> <p>The second sentence of abstract was corrected by adding an "s" to people.</p> <p>The scientific precision was also made at the end of abstract.</p> <p>Tense in introduction was corrected.</p> <p>Ectomycorrhizae such as <i>Cantharella</i> and <i>Lactarius</i> species</p> <p>I briefly explained how mushroom description was done.</p> <p>Names of mushroom description authors have been included in the text where the mushroom appears the first time. Hence, table 1 was amended accordingly.</p>	<p>The list of WEM providing vitamins is nearly uncountable. All WEM provide vitamins and mineral, in various contents and quality, though. Hence, we cannot just list them or a few, since the study did not carried out chemical analyses on vitamins.</p> <p>Examples of cultivated mushroom provided are of <i>Agaricus bisporus</i>, <i>A.campestris</i> and <i>Lentinus edodes</i></p> <p>In European and American countries, the period of natural growth coincides with the autumn season. Hence, all occurring WEM are picked up for home consumption and marketing. Hence it was not possible to provide examples.</p> <p>Hence, all remarks of reviewer n°1 were accounted for.</p> <p>Note also the acknowledgements section was edited.</p>
<b><u>Optional/General</u></b> comments
