Manuscript Number:	Ms_CJAST_46153
Title of the Manuscript:	Removal of Hexavalent Chromium from Aqueous Solution using Unmodified saw Dust: Batch and Column Studies
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	1. Reference calls in the text are not homogeneous. Authors should check for homogeneity. 2. Many grammar mistakes are found through the text. Authors must carefully review the whole manuscript. 3. The initial adsorption rate (h) do not appear in equation 4. 4. For the Freundlich isotherm, the statement "By definition, the adsorption intensity, n , is less than unity [26]", is not true, values can be higher than 1. 5. "Fig" or "figure" through the text must be homogeneous	1- CORRECT ON MANUSCRIPT 2- ATTEMPTED CORRECTIONS ON MANUSCRIPT 3- CORRECTED ON MANUSCRIPT 4- MODIFIED WITH REFERENCE IN MANUSCRIPT 5- CORRECTED ON MANUSCRIPT
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
