<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>Minor revision suggested: Authors have reported an investigation on <i>Hibiscus sabdariffa</i> and <i>Delonix regia</i> dye extracts and their mixture as natural sensitizers for <math>TiO_2</math>/DSCs. In general this manuscript is written lucid and well structured. Thus, it is commendable of publication in the <b>current journal of applied science and technology</b>. I have gone through manuscript and found that, the work is admirable but before acceptance for publications following corrections should be incorporated;</p> <ul style="list-style-type: none"> <li>The text in Figure 1 (a) is not clearly readable. Need to improve it.</li> <li>Figure 2 and 3: need to furnish all borders to looks reasonably.</li> <li>As I found that there are some latest citations (2018) are needed for the dye sensitized solar cells; for instant, New J. Chem., 2018, 42, 12024—12031; Journal of Photochemistry &amp; Photobiology A: Chemistry 363 (2018) 1–6; New J. It has also been highlighted in the revised manuscript</li> <li>For Figures 2 and 3, borders have been introduced. It has also been highlighted in the revised manuscript.</li> <li>As for the suggested latest citations, I have gone through them and I found them not relevant for our current research. But future research endeavours, they would be useful.</li> </ul>
