PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The research in this paper is worthy of affirmation. By combing the kitchen sink system from 1973 to 2016, the author found that new technologies and new ideas were gradually applied in the sink system in the continuous improvement. It also provides a reference for the design and development of new flume in the future. However this work presents deficiencies that need be corrected for a future publication in a scientific journal: 1.To indicate the research limitations and formulate trends for future research. 2.Question sentences should be used for research conclusions ? 3.	1. We have provided such information at section 4: Summary of Review works on sink evolution. Please be kindly noted. 2. This is a review paper and hence there is no 'conclusion'. Similar way of representation has been used by the following articles which has been published to the same journal. They are as below: <ul style="list-style-type: none"> C.Z. Eugene, J.J. Lim, Umar Nirmal, S.T.W. Lau, Battery Powered RC Boats: A Review of Its Developments for Various Applications, Current Journal of Applied Science and Technology, vol. 33 (5), pp. 1–29, 2019. B.X. Koh, Umar Nirmal, M.Y. Yuhazri, Developments on Baby Strollers over the Last Decade, Current Journal of Applied Science and Technology, vol. 33 (6), pp. 1–25, 2019. W. C. Tang, Umar Nirmal, Saijod T. W. Lau and Sharweeni Murugan, A Review on Managing Solid Waste Produced from Homes in Malaysia, Current Journal of Applied Science and Technology, vol. 34 (5), pp. 1-23, 2019. We hope it will be ok in the current form for publication. Thanks
