

Editor's comments:

stated below, one mistake must be revised.

on line 65 -Study design

Please correct to "Descriptive cross sectional study "

The study was descriptive and of the cross sectional variety. ANC at the health facilities were the participants in the study which lasted for 11 months

Author's feedback:

Thanks for the corrections.

The statement about the study design haon line 65 has been corrected to read "The study was a descriptive cross sectional study. Participants in the study were pregnant women who came for ANC booking at two selected health facilities in a rural community. The study lasted for lasted for 11 months"
