

**Editor's comments:**

Kindly find attached my comments about the article.

**Author's feedback:**

Thanks for the comments and corrections. We really appreciate

Please the recent responses/corrections in the manuscript are highlighted with light green colour

1. The name of the hospital has been removed from the abstract
2. All other comments on the abstract were effected
3. Studied was removed in line 39 as commented.
4. Description of the study area (Lines 50 - 61) was modified as suggested by the reviewer and the statements that needed to be removed were so removed
5. The study design has been modified to convey a meaningful statement
6. "aking" in line 66 has been changed to "making"
7. Apologies for being too technical in the proportionate allocation of samples. It was less complicated in my initial draft. A previous reviewer wanted explanation on how that was done. However, I have effected the suggestion.
8. Other comments were noted and the necessary corrections were effected
