EDITORIAL COMMENT’S on revised paper (if any)	Authors’ response to editor’s comments
<p>Two minor corrections required</p> <p>Please find attached file</p>	<p>Thank you for the suggestions. (1) In Figure 4, each of the 3 indicators having its own unit (km, hour and hour), those units are corresponding to the vertical axis units when we consider the indicators separately. They are shown in blackets in the legend. For DAT for example, vertical axis unit is km. If we consider AT or FDWT, the unit is hour. The values don't change because of the change of units. (2) In the conclusion, however, i have revised and changed “shown” into “showed”.</p>
