	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>I consider that the paper has merits to be published.</p> <p>The present work describes a method to preserve the characteristics of the leaves of Moringa oleifera. It compares a new method that incorporates freezing steps. The new methodology is compared at the same time with the product obtained through a less technified process.</p> <p>The work is relevant and important Relevant because it establishes a standardized production of M.oleifera for later investigations.</p> <p>The importance lies in the potential possibilities of the plant components. It is necessary that through scientific methodology an adequate production is established in reproducible mode for later studies.</p>	<p>I agree with the reviewer.</p> <p>The work presents an important theme.</p> <p>New work will be carried out to evaluate the storage of lyophilized powder, together with microbiological analyzes.</p> <p>Thanks for the suggestions.</p>
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
