

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>The editorial decision for Manuscript Titled: "Sero-prevalence and risk factors for hepatitis A virus infection among pregnant women at the Samandin Medical Center, Ouagadougou, Burkina Faso" is accepted with Minor changes.</p> <p>Abstract: The results section should be simplified and readable. Since none of the results are statistically significant, its wise not to include the statistics in the results section.</p> <p>The quality of the tables in the manuscript is bad. I suggest making the tables again.</p>	<ul style="list-style-type: none">- Abstract: we have removed the confidence intervals (IC 95) and simplified the Result section.- We have improved the quality of all tables by establishing them in the format requested by the Journal.- We added some reference to enrich the manuscript without modifying the previous text.- All new changes have been highlighted in yellow
