PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article needs a review in English presented, because at some point in the discussion it was confusing. The summary can be reduced and the formatting of the results and discussion reformulated.	The abstract was reduced and redrafted, and the introduction, results and discussion rewritten
Minor REVISION comments	In the introduction could be inserted more botanical information on the species analyzed. It would be great work to insert a phytochemical analysis, allowing and validating through results the statements about the phytochemical potentials present in the analyzed plants.	Information on plant species studied and their chemical content was included in the active compounds,
Optional/General comments	The article presents an excellent idea and of great relevance to the area of bio-sustainable agriculture. It would be of great value to develop other studies evaluating the efficiency of extracts of these plants using other extractive methods besides the aqueous extract.	Other field studies can be conducted to evaluate the efficacy of plant extracts studied,
