Title of the Manuscript:	Evaluation of Awareness of Susceptibility to Human Papilloma Virus and Cervical Cancer Screening among Nurses at University of Benin Teaching Hospital, Benin City, Nigeria.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I thank the authors for the efforts there is a lot of work to do at least comparing with the SAME SUBJECT ON THE SAME COUNTRY (see article Muñoz N, Bosch FX, Sanjosé S. The causal link between human papillomavirus and invasive cervical cancer: a population-based case-control study. Int J Cancer. 2006;119(5):1108–1124. doi: 10.1002/ijc.21953).</p> <p>The aim of the paper is The study aimed at evaluation of awareness of Susceptibility to Human Papilloma Virus and Cervical Cancer Screening among Nurses at University of Benin Teaching Hospital.</p> <p>I appreciate this but don't forget talk about <u>other RISK FACTORS NOT CAUSES</u>, there is a large difference.</p> <p>The results are still not strong enough to bring new issues to the paper.</p>	<p>I appreciate the reviewer's opinion but this work is focused on one factor and how nurses perceive this very factor. About the result, research is on- going and more work is being carried out by the team on the area.</p>
