PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>It's a well written case report, just required some amendments, after which it can be published. Kindly look upon the suggestions given below.</p> <p>1) In OPG the size of lesion is quite bigger to be considered as dentigerous cyst as one of its differential diagnosis thus I would like you to remove dentigerous cyst from the differential diagnosis.</p> <p>2) A very similar lesion radiographically was reported by Bajpai M et al recently a multilocular unicystic ameloblastoma of mandible, I would like you to discuss that lesion in the discussion also cite their article given below (in brackets).</p> <p>(Bajpai M, Agarwal D, Bhalla A, Kumar M, Garg R, Kumar M. Multilocular unicystic ameloblastoma of mandible. Case Rep Dent. 2013;2013:835892. doi: 10.1155/2013/835892.)</p> <p>3) I would like to know whether the CBCT was done for this case ?</p> <p>4) How would you restore the defect after surgery ? What about id canal ?</p> <p>5) I would like you to add a note on the different terminologies used for okc, ooc and kcot in the discussion part.</p> <p>6) I would like you to add a note on histopathological feature where an OOC associated with dentinoid formation in the discussion.(reported by Bajpai M) also want you to cite that particular article.</p>	<p>Thank you for the appreciation sir . we have made the necessary corrections in the manuscript.</p> <p>No sir ,only a computed tomograph was done for the patient .</p>
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
