author should make the editorial changes:	
The title of the article needs to be changed to better describe the nature of the article.	Thank you for the suggestions sir . we have made the necessary corrections in the manuscript.
Also, the treatment provided needs to be more fully explained.	
Did they resort to resection of the jaw because of the size of the lesion?	
Was there consideration of shrinking the size of the lesion by first performing marsupialization then enucleating it?	Thank you so much for the suggestions.
I agree with their treatment method but the reader needs to be informed of their treatment rationale.
