

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1) what is the meaning of the sentence:</p> <p>It is also conceivable that proteins in tissues are carbonylated by other mechanisms such as "glycation and"; or the reaction with aldehydes generated from lipid peroxides rather than by direct oxidation of amino acid residues[14][15].</p> <p>I guess that the object could be : advanced glycation "end" products (AGE)</p> <p>2) cell membrane proteins like serine, rich in serine?</p> <p>3) abstract: The brain, heart and kidney tissue homogenates were prepared and biochemically analyzed for products of protein oxidation using antibodies against 2,4-dinitrophenylhydrazones.</p> <p>in methods, authors just describe the spectrophotometric evaluation of protein-hydrzone content no mention of antibodies</p>	<p>It is also believed or agreed upon or deduced.</p> <p>Correct.</p> <p>Rich in serine, correct.</p> <p>Corrected.</p>
