

Editor's comment :

1. No weather conditions for conducting research were presented in the manuscript.
2. Marking the significance of differences between the means in Table 2 (C) and Table 3 (OC) are incorrect.
3. Technical improvement of the manuscript is needed.
4. The numbering of sub-chapters is incorrect.
5. The manuscript should be prepared in accordance with the pattern used in papers already published in the journal (<http://www.sciencedomain.org/page/general-guideline-for-authors>)

Author's feedback :

1. Weather condition for conducting research has been addressed on page 3 of the manuscript including figure 1 which was previously omitted. This addition necessitated changes on numbering of subsequent figures in the manuscript.
2. Errors in marking the significance of differences between the means in Table 2 (C) and Table 3 (OC) have been corrected as indicated in yellow highlight (page 10 and 14) of the revised manuscript
3. The revised manuscript has been technically improved following the SDI authors guide and MS word template for writing manuscripts.
4. Numbering of subchapters on pages 10, 13, 14, 16, 17 and 18 has been corrected to read 3.3 – 3.8
5. The revised manuscript has been prepared in accordance with the pattern used in the SDI template. The difference was due to the fact that an original manuscript was prepared in according to the pattern specified in Author's guide for the former American Journal of experimental Agriculture which is now renamed Journal of Experimental Agriculture International based on the information specified on the journal site.
