Manuscript Number:	Ms_JEAI_48170
Title of the Manuscript:	STRATEGIES FOR INCREASING THE APPLE EPIDERMIS RED COLORED WITH PHYSIOGROW <sup>®</sup> COLOR
Type of the Article	<u>Original Research Article</u>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	Interesting work, is not observed in the manuscript a discussion based on statistical results (analysis), this product has been applied in other fruits? global effects? in general the manuscript need you more support of scientific, otherwise discussion would be as a work of technical manual.	The product tested has entered the market recently and is being tested in different cultures. It has been used to standardize the coloration of table grape berries (in Chile and Brazil), but for the apple tree culture is still in the test phase.
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
