PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Even though the literature review is adequate to the purposes of the article, it is recommended that the authors developed a more profound theoretical foundation for the issue discussed in this manuscript, especially, in regards to the concept of cross-culture social adaption, because the definition needs more attention. It is also recommended that that authors describe in detail the methodological procedures adopted in this manuscript so that readers will be able to understand the conclusions they reached. The results need to be described in accordance to the theoretical and methodological frameworks adopted in this study, in so doing it is recommended that the authors present theoretical and empirical evidences to support their aims. For example, the authors' assertion in relation that "social network of foreign students and its heterogeneity are the important factors that influence the cross-cultural adaptation of international students" needs this kind of support. Conclusions also must be based on the theoretical and methodological foundations used by the authors.	The content of the questionnaire is a supplement to my views. The beginning and the end of the article are all discussed social network of foreign students and its heterogeneity are the important factors that influence the cross-cultural adaptation of international students.
