Type of Article:	<b>Original Research Article</b>

**PART 2:**

<b>FINAL EVALUATOR'S comments on revised paper (if any)</b>	<b>Authors' response to final evaluator's comments</b>
<p>I recommended that the authors develop a more profound theoretical foundation for the issue discussed in this manuscript, especially, in regards to the concept of cross-culture social adaption, because the definition needs more attention. It is also recommended that that the authors describe in detail the methodological procedures adopted in this manuscript so that readers will be able to understand the conclusions they reached. It seems to me that the authors did not consider these two aspects in their revised manuscript.</p>	<p><b>I have added a little more about the definition of cross-cultural adaptation. The main conclusions drawn about which I is based on the questionnaire, I think there is a big difficulty, and the article also illustrated that the results of the questionnaire. After listening to your advice, I have added some text instructions.</b></p>
