PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. As the cited references and the briefly mentioned, the questionnaire used in this study may not be standardized for stress test. Some psychologically standard questionnaires for stress test should be used. 2. The study fields and blood groups of participants should be fixed variables and used as inclusive criteria to select participants. Certain blood groups and study fields should be selected in a given numbers (close or equal among study groups) in order to get reliable results. For examples, numbers of participants with blood groups A, B, AB, and O should be in the ratio of 1:1:1:1 but your results was 94:27:52:146 which could cause bias. 	<ol style="list-style-type: none"> 1. The questionnaire used was standard and has been used in several previous studies. 2. That has been included among the limitations of the present study.
