PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Compulsory REVISION comments | <p>This manuscripts well-written in general. I suggest the authors discuss a little bit more about the potential "Medical" meaning of the outcome from this study on "Ethanol Extract of Ripe and Unripe <i>Dennetia tripetala</i> Fruits". Recent literatures like "Effect of ethanol extract of ripe fruits of <i>Dennetia tripetala</i> on prostatic and testicular functions of male albino rats, The Journal of Medical Research 2018; 4(2): 89-92" would be helpful for such discussions. I suggest the author(s) add some descriptions on how to distinguish between the ripe and unripe status of the fruits. The format of formula can be improved, for example, should "%" be ahead of the variables? Should we add numbers for all formulas?</p> | <p>Done-see last paragraph under discussion</p> <p>Done-highlighted with yellow</p> <p>Formula has been modified</p> |
| Minor REVISION comments | <p>The order of 2.5-2.7 is not correct. There are two "2.7" and "2.6" is behind "2.7" In 2.7, "ethanol extract of ripe and unripe" should be "ethanol extract of ripe and unripe"</p> | <p>Done</p> |
| Optional/General comments | | |

PART 2:

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
