PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Methodology is very poor rewrite. For antimicrobial study of any products is important more methods for testing. About honey exist hundred manuscript and author just cited only 19. For scientific community is important information about properties of honey not only locality. I don't agree if is so easy we can start in world use honey as natural product and don't need antibiotics for illness. In world exist methods how testing microorganisms with method and also how we ned test antibiotics. Authors didn't write methodology about identification of bacterial strains some biochemical which is not right, any molecular or another method.	We have corrected the section as prescribed by the reviewer
Minor REVISION comments	Only small formal mistakes.	Done
Optional/General comments	Very poor write.	Modified the manuscript

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
