PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Please correct all the necessary grammatical and typo errors highlighted in the text.	All grammatical and type errors have been corrected.
Optional/General comments	Overall, it was a good piece of work. However, 16 S rDNA sequencing for the identification of species still remain a necessary tool in the project.	Thanks for that remark. We didn't perform 16S rRNA gene sequencing of the isolates in this study due to lack of facilities. Based on the results obtained from this part of the work we are planning for sequencing in the next step.

PART 2:
