| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|---|--|
| <p>The author modified the manuscript according to the observation made. I hope that it should be accepted after minor revision in the introduction, results and the reference list.</p> <p>All the observations are underlined in red in the manuscript.</p> | <p>All the corrections are inserted in the text as required by the evaluator. I revised all the list of references for a good consistence of the work. For Tables 3 & 4, a, b, c were not put on the figures just because these are comparative tables between activities.</p> |
