# **PART 1:** Review Comments

Compulsory DEV/ISION corresponds	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	However, please find my comments for the manuscript entitled 'Effects of lubrications on the wear parameters of metals using Pin-On-Disk test rig':  (1) The literature review is too lengthy. However, it do not cover engough reference.  (2) The literature review do not sufficiently explain the scope of the present work.  (3) Fig. 2-7, the legend on the X-axis should include its unit.  (4) How many samples were tested under each condition? How is the reproducibility of the results?  (5) No strong technical discussion involved.  Due the the above said major draw backs, I would recomment for a Major Revision of the manuscript.	
Minor REVISION comments		
Optional/General comments
