PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript is well written, with precise focus. However, the literature review aspect was deficient, in that the author did not address a comprehensive analysis of the environment that gave rise to the herdsmen crisis in Nigeria. Beyond ethnic colouration, the author should indicate the political factors that underlies the crisis, especially none prosecution of the culprits who engaged in purely criminal activities while those resisting were subjected to criminal prosecution.	
Minor REVISION comments	The manuscript requires thorough professional language editing.	
Optional/General comments
