PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	The subject is interesting. However, some issues should be improved: • The methodology has to be expanded and the specific SNA procedures and analysis adopted must be more explicit and detailed. • Figures 1 to 4 have very poor reading. I suggest their replacement for increased quality images, one per page, horizontally aligned. That will immensely improve the reader's ability to interpret the images. • A three paragraph conclusion is clearly insufficient and must be expanded in order for the article to be publishable.	
Optional/General comments
