Journal Name:	<a href="#">Asian Journal of Research in Agriculture and Forestry</a>
Manuscript Number:	Ms_AJRAF_47239
Title of the Manuscript:	Tree Species Diversity and Population of Ikogosi Warm Spring and Arinta Waterfall Watersheds: Implication for Sustainable Ecotourism
Type of the Article	Original research paper

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	1.The aim could be more clear. 2.Suggestions: 2.1. To characterize the species diversity would be recommended to use the "exponential of Shannon entropy" (CHAO, A. et al. Rarefaction and extrapolation with Hill numbers: a framework for sampling and estimation in species diversity studies. Ecological Monographs, v.84, n.1, p.45-67, 2014). 2.2. To similarity would be better to use an "abundance-based index" (CHAO, A. et al. A new statistical approach for assessing similarity of species composition with incidence and abundance data. <i>Ecology Letters</i> 8, 148–159, 2005). 2.3. Try to organize the "table 2" by family. 2.4. Would be interesting to check if there is significant differences between the means (dbh and height).	
<b>Minor</b> REVISION comments	In the geographical coordinates, would be better to replace "1" by '.	
<b>Optional/General</b> comments
