

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Infectious Diseases
Manuscript Number:	Ms_AJRID_48904
Title of the Manuscript:	Molecular surveillance of common wild birds as potential hosts for selected zoonotic viruses within Ibadan, Nigeria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	This is a very straightforward manuscript, which tests for the presence of a wide array of. Viruses in a similarly broad group of avian species in Nigeria. The methodology is sound. However, no viruses whatsoever were detected in any of the species. This is a very surprising outcome, especially considering the number of birds tested and the number of viruses tested for. Nonetheless, although the results are completely negative and don't really add anything new, given the strengths of the experimental approach, the manuscript deserves to be published.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes. Kindly please write down the ethical issues here in details)
