

SDI Review Form 1.6

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_37720
Title of the Manuscript:	FUNGITOXIC POTENTIALS OF EXTRACTS OF PLANT ORIGIN AGAINST FUGAL ROOT ROT OF CASSAVA (<i>Manihot esculenta</i> Crantz) IN STORAGE
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Line 69: change rotted to rotten Line 74: Change " Peathogenicity " to Pathogenicity Line 77 and 78: State the method/materials used for pathogen identification Line 82: Drying of leaves at a temperature of 60°C for 24 hours will denature the biological active ingredient in the leaves, air drying at room temperature should be used. Line 83: Change "ground" to milled</p> <p>MATERIALS AND METHODS Commercial or synthetic fungicide such as mancozeb should be used as positive control</p> <p>RESULTS Analyze result in the tables using Duncan Multiple Range Test; separate the means using Duncan letters. Standard Error should also be included, example 82.00±13.15</p> <p>DISCUSSION Page 198-200: The author stated that all the pathogenic organisms isolated in this work have been previously isolated /reported by many authors. Could the author be more explicit in stating his contribution to knowledge and the uniqueness of this article with respect to the isolated pathogens?</p>	
Minor REVISION comments		
Optional/General comments
