

**SDI Review Form 1.6**

Journal Name:	<a href="#">Cardiology and Angiology: An International Journal</a>
Manuscript Number:	Ms_CA_48172
Title of the Manuscript:	Mobitz type 1 second-degree atrioventricular block in Anterior wall myocardial infarction – An extremely rare association
Type of the Article	Case report

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Although the case is reported correctly, there is nothing special or extraordinary in it. AV blocks are common in AAMI, and the level of IRA occlusion does not necessarily mean the septal branch is involved nor spasm is present. This could be a pure coincidence or just an increased parasympathetic activity, as it was clearly explained in the Discussion. Also, a retrograde thrombus migration may also be the underlying cause (note the thrombus visible in the culprit lesion).</p> <p>ECG To me, there is also ST elevation in I and aVL leads. Moreover, which formula was used to calculate the corrected QT interval?</p>	
<b>Minor</b> REVISION comments	spaces are not used within the text, it makes the reading difficult	
<b>Optional/General</b> comments	Overall impression: good presentation, thorough discussion.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

**Reviewer Details:**
