General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The subject studied is very important. Nevertheless, in the discussion of the results obtained no comparison with existing values. In addition to the version of the manuscript we received, there are missing tables and figures. This makes it difficult to judge the discussion. References must be consistent with the development of the SDI manuscript.	
Minor REVISION comments	1. Review the method used to identify richer samples of macro and micro nutrients. I propose you to realize an ACP that could 2. There is work on T. catappa almonds or you can find polyphenol, macro and micronutrient values. 3. Insert tables and figures	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
