

SDI Review Form 1.6

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_48108
Title of the Manuscript:	Patient food preferences can help plan hospital menus for older patients
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Good work.	
Minor REVISION comments		
Optional/General comments	<p>Your well thought out topic- 'Patient food preferences can help plan hospital menus for older patients' has been generating an interesting conversation sequel to the science of gut microbiome taking a centre stage. I would have thought that as part of your recommendation, the need to 're-florestate' the gut microbiome should have been top on the banner, owing to the fact that food can and should be used as medicine.</p> <p>Allopathic medicine can greatly be enhanced if only nutrition and sanitation can be allowed to take a front seat. This is so because in the past, infectious diseases were largely tamed with cocktails of fruits and vegetables. With the advent of technology, food can be made functional through fermentation.</p> <p>I believe, if fermented foods can be incorporated in the hospital menu of the elderly patients, most of the adverse effect from these synthetic drugs would be largely managed, immune system would be greatly boosted and the overall health status would be massively improved.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
