

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_48436
Title of the Manuscript:	PREVALENCE AND DETERMINANTS OF MALNUTRITION IN UNDER FIVE CHILDREN IN EGUME, KOGI STATE, NIGERIA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I have carefully gone through author's reply to my comments. I appreciate tauthor/s for revising the manuscript. Further, I agree that socio-economic attributes of mothers have been described. When I look at discussion part on these 'attributes vs nutritional status', no doubt, findings are beautifully presented and discussed, but author/s has again escaped adding cross tabulation of data on these variables, which is a prerequisite. To me it seems that author has taken for granted readers of having knowledge what might have gone in the background analysis.</p> <p>Anyhow, I agree that article may be published.</p> <p>Note: For future, I advise the learned author to cross-tabulate independent variable and dependent variable, whenever one wants to understand association between two variables (taking independent variable in columns and dependent in rows of table and then apply Chi-square test.</p>
