SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Manuscript is scientifically robust and technically sound. Authors need to address the following: Syphilis should be replaced with Treponema pallidum since it is the causal agent for the disease.</p> <p>Abstract Objectives should reflect manuscript title. State the statistical packages used. Line 17-Disease should be changed to infection. All percentages in parentheses should be round off to one decimal place. Recommend in one statement after conclusion. Keywords: Use only words captured in Manuscript title e.g Ghana, HBV, HIV, T. pallidum, Donor rejection etc.</p> <p>Materials and Methods Describe study area with cited references.</p> <p>Results Present result percentage in one decimal place. Table 1 and 2 can be merged together and title needs to be reframed to suit study objectives. Use black and white to differentiate graphs/figures. Colors not clear. Figure 6 not clear. Find appropriate way of presenting it.</p> <p>Discussion Relate findings with previous studies from other countries other than Ghana. E.g: Africa, Asia and Europe. Conclusion is scanty. Give us your striking findings and recommend in few statements.</p>	
Minor REVISION comments	References should be arranged based on Journal guidelines.	
Optional/General comments	Introduction is well written but few references cited.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
