General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper is short but precise, the title of the paper fits the main body, the stated objectives were achieved, the discussion was excellent and the conclusion was done according to the stated objectives likewise certain reasonable recommendations were made. The only problem is the sample size, the sample size is too small. The author should have use large sample size to achieve representativeness in the study population	
Minor REVISION comments	Most of the references cited were recent	
Optional/General comments	The paper was excellently written. Next time whenever the author is embarking on a research he/she should use large sample size	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
