Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1-in my opinion the whole article must be reviewed by the authors again because there are too many grammar and spelling mistakes that makes it difficult to understand for the reader . their style in writing is Poor and insufficient for expression and emphasis of their ideas .</p> <p>2-discussion part is mostly composed of explanations about the cost and technical applications. The differential diagnosis of pyogenic granuloma and pilomatricoma may be compared in more detailed way both clinically and pathologically. .there are pathological variants of pilomatricoma .explanations regarding this may be added to the text with a figure of the excised specimen and with an additional figure legend.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
