General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I have gone through the manuscript and it reflects a good piece of science. However, some major and minor comments are raised which should clarify well prior to finally acceptance of the manuscript. Please give the Sample identification no. °C should be like this throughout the manuscript. Data is not adequate, because they use maximum no after decimal. They should write like 0.41 ± 0.0004 or 4×10^{-4}	
Minor REVISION comments	The guide line of the journal should be strictly followed for the writing of References and units. Check the grammatical errors throughout the manuscript.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
