<b>Compulsory</b> REVISION comments	<p>In this paper an interesting idea of defining a penalty method using the three term conjugate gradient scheme for solving the unconstrained minimization portfolio management problems is presented.</p> <p>However, this manuscript is very hard to read and analyse since it is very unsystematic and unorganized with so many undefined sentences and unmarked relations. (Some of them are marked by sticky notes in the paper.)</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
