

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_48716
Title of the Manuscript:	An Investigation of the Use of Eigenvalues in Human Face Modeling for Recognition Tasks
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Please let me communicate mandatory revisions to this paper:</p> <ol style="list-style-type: none"> 1) The abstract appears as an introduction and would require references. Consequently, rewrite the entire abstract and clearly state what this paper is about including a concise summary of the findings. 2) In the conclusions "moving average filter" is mentioned six times, however, the manuscript does not clearly define that particular filter. Is it a Savitzky-Golay filter, is it a weighted average? 3) There are several statements that need specific details, e.g., what exactly is meant by "eigenvector" – do you calculate a singular value decomposition, and of what? What exactly is the role of the neural network? <p>Overall, please provide scientific detail with mathematical rigor and with clear description of the filters that were utilized.</p>	
Minor REVISION comments	Please improve some sentence construction, however, most important are edits regarding scientific contents!	
Optional/General comments
