PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	A study on the prevalence and antibiotic sensitivity of Group B Streptococcus: 1. The Abstract should focus on the resistant rather than sensitive antibiotics since conclusion is focused on the resistance 2. It was concluded in the Abstract that low parity, young maternal age and term pregnancies are potential risk factors for colonization. I tend to disagree that young age and term pregnancies are risk factors since they showed no significant trend	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
