Manuscript Number:	Ms_JAMPS_48852
Title of the Manuscript:	TISSUE PROTEIN CARBOXYLATION IN AGING: A STRATEGIC ANALYSIS OF AGE-RELATED PROTEIN MODIFICATION
Type of the Article	Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1) Line 56, please mention sex of animals. 2) Line 66, states that 'All animals were collected immediately after birth.' Please elaborate meaning and correct the sentence. Pups should be weaned at the age of 21 days. <ul style="list-style-type: none"> • Refer: Suckow, M.A., Weisbroth, S.H. & Franklin, C.L. (2005). The Laboratory Rat, 2nd Edition. San Diego, CA: Elsevier Academic Press. 3) Line 80, please correct unit of absorbance. It should be nm instead of mm. 4) Line 96, please correct age since there is no data at 0 day time point. 5) Line 100, seems significant difference is between age 25-50 days and 65-90 days instead of just 25-30 days and 65-90 days. 	
Minor REVISION comments		
Optional/General comments
