**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The characteristics of monthly average wind speed, solar radiation, minimum temperature and total rainfall the study generated and presented on figures 4.1, 4.2, 4.3 and 4.4 respectively are not much of what enables to achieve the main objective of the study which is to determine the effects of Sahara dust particle and some weather variables on the global warming sourced from the Birnin Kebbi Local Government Area of the Kebbi State of Nigeria. Moreover, the study was founded on faulty understanding of what causes depletion of ozone layer, and how carbon dioxide causes global warming where yellow highlighted on the copy of manuscript here reattached.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
