<b>Compulsory</b> REVISION comments	<p>This manuscripts well-written in general.</p> <p>I suggest the authors discuss a little bit more about the potential "Medical" meaning of the outcome from this study on "Ethanol Extract of Ripe and Unripe <i>Dennetia tripetala</i> Fruits". Recent literatures like "Effect of ethanol extract of ripe fruits of <i>Dennetia tripetala</i> on prostatic and testicular functions of male albino rats, The Journal of Medical Research 2018; 4(2): 89-92" would be helpful for such discussions.</p> <p>I suggest the author(s) add some descriptions on how to distinguish between the ripe and unripe status of the fruits.</p> <p>The format of formula can be improved, for example, should "%" be ahead of the variables? Should we add numbers for all formulas?</p>	
<b>Minor</b> REVISION comments	<p>The order of 2.5-2.7 is not correct. There are two "2.7" and "2.6" is behind "2.7"</p> <p>In 2.7, "ethanol extract of ripe and unripe" should be "ethanol extract of ripe and unripe"</p>	
<b>Optional/General</b> comments
