PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The author(s) provided interesting review of "ANTIMALARIAL DRUG RESISTANCE: AN EXISTENTIAL BURDEN FOR THE DEVELOPING WORLD". I'm highly impressed by the writing style and good use of English language. However the in-text references and the reference list need to be reviewed to reflect true Vancouver referencing style. Example:</p> <ul style="list-style-type: none"> When quoting two different references in the text, the reference numbers should be enclosed in one parenthesis separated by comma, eg [1,2] and [3,1]. The reference list should be in this form: <p>8. Sibley, C.H., Price, R.N. Monitoring antimalarial drug resistance: applying lessons learned from the past in a fast-moving present. International Journal for Parasitology: Drugs and Drug Resistance. 2012;2:126-133.</p>	
Minor REVISION comments		
Optional/General comments	A very comprehensive review of the subject matter.	

PART 2:
