**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The manuscript needs to be edited for grammar and syntax. I suggest to re-write these vague statements. Please clarify your sentences.</p> <p>(L161) Since LCOE is a calibration tool, there is a great deal of sensitivity to the assumptions used, especially when the <b>lifepan</b> of the installation is extrapolated several years into the future <b>[20-22]</b>. It therefore theoretically takes into account all the costs related to the installation and this for all its life-time.</p> <p>(L182) Note that simulations were carried out for the different localities mentioned in <b>table 4</b>. The results obtained show that the lowest production is recorded in Gaoua and the more important is registered in Ouahigouya.</p> <p>(L185) In view therefore of the results of figure 2, we will focus our study on the localities of Ouahigouya and Gaoua.</p>	
<b>Optional/General</b> comments	The paper is presenting in-depth simulations and analysis results. This paper has a potential to be accepted, but some minor revisions must be made.	

**PART 2:**
